

## Jackson Dental Study Club Introduces: ACCESS to CARE Program

The Jackson Dental Study Club was formed in 1998 to provide a structured learning environment for dental professionals to share individual experiences, formulate interdisciplinary teams and advance the dental health of the Jackson community.

Today our commitment to community service and quality patient care is stronger than ever. Introducing our new **Access to Care** program.

The **Access to Care** program is designed to provide dental implant treatment to patients in our community. Including those who may have considered implants in the past but costs may have prevented them from seeking treatment.

Through coordinated efforts with nationally recognized dental implant research and manufacturing companies, a regional dental laboratory, and the Jackson Dental Study Club dentists, we are now able to offer substantial cost savings to eligible patients.

To learn if you qualify for this unique program, please call your Jackson Dental Study Club dentist.
